

# HCP-50, HCP-100 Helicopter Control Panels

HCP-50

These control panels are used as remote control heads for the BMT75/85 transmitter and the TAA-101 antenna actuator in helicopter systems. Weighing approximately 1 lb., they provide remote control of the transmitter on/off, transmitter channel selection, and transmitter offset selection. An LED is provided indicating that the transmitter is locked on frequency. The TAA-101 antenna actuator is deployed and stowed via the Actuator up/down switch. LEDs are provided for visual indication of actuator status.

HCP-100

Options to provide control of filter selection, antenna selector, and video scrambling on/off, when the auxiliary hardware is part of the transmission systems, may cause the need to go to the larger HCP-100 control panel. Post lamps (available only on the HCP-100) may be connected to cockpit dimming circuit.

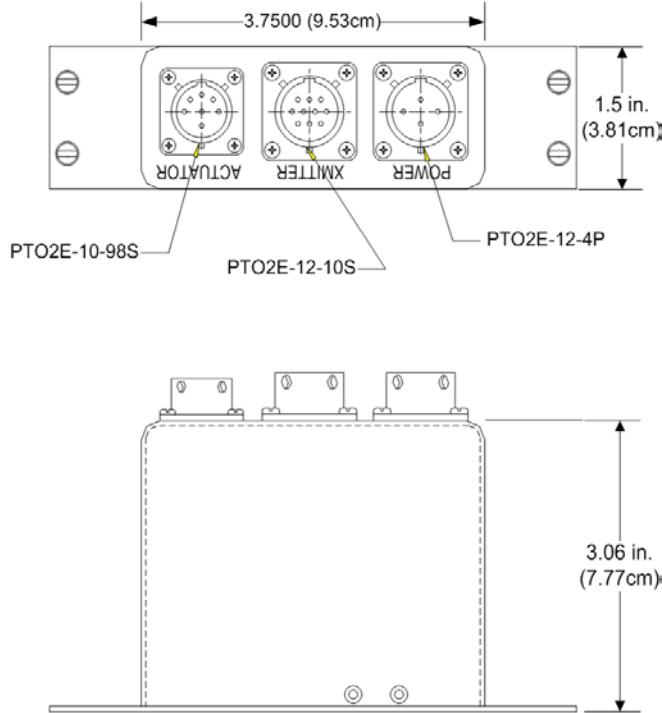

Specifications	HCP-50	HCP-100
Size	1.5" x 5.75" x 3.06" D (3.84 x 14.61 x 7.77 cm)	3" x 5.75" x 1.9" D (7.62 x 14.61 x 4.83 cm)
Weight	< 1 lb.	< 1 lb.
Panel Fasteners	DZUS (x4)	DZUS (x4)
Actual Limit Lights	Yes - Green/Up, Yellow/Down	Yes - Green/Up, Yellow/Down
Panel Illumination	No	Yes, Post Lamps, Dimming Circuit Compatible
Channel Selection	Rotary Knob	Thumbwheel(s)
Options		Transmit & Receive Function Is Available With HCP-100 to Provide Relay Capability. Contact Factory For Details.
	Other Systems Functions May Be Added At Time Of Order Such As Filter Selection, Antenna Selection, Video Scrambling On/Off/Reset. (Specialty Panels Available, Contact Factory With Requirements)
